

Research Assistant (m/f/d) - University Eye Clinic

The Section for Clinical and Experimental Sensory Physiology (headed by Prof. Dr. Michael Hoffmann) at the University Eye Clinic investigates the physiology, pathophysiology and plasticity of the human visual system. As part of a current research project, a position for a research assistant is available. We are looking for a committed candidate with an interest in studying the human visual system using non-invasive electrophysiological methods. The position is embedded in the versatile, stimulating working environment of modern ophthalmology and is in direct interaction with a young international team of researchers.

Our offer:

- Position: Research assistant 20-80h/month
- Start: at the earliest possible date
- End: 31.12.2024 (extension possible)
- Location: University Eye Clinic, Leipziger Str. 44, Magdeburg
- Supervisor: Prof. Dr. rer. nat. M. B. Hoffmann/J. Kuske
- Training: Intensive familiarization with non-invasive electrophysiology of the human visual system of the human visual system
- Team: Interdisciplinary team for ophthalmologic research and patient care.
- Salary: Remuneration depending on degree/training

Your tasks:

- Non-invasive electrophysiological recordings from the human visual system in normal subjects and patients

Your qualifications:

- Ideally BSc or MSc in Optometry, Psychology, Neurosci. or similar.
- Experience with the organization and execution of subject measurements.
- Experience with data management
- Very good team player, ability to work independently, reliability
